Opportunity Gap
Gold standard; nearest to ground truth
No competitor does this as well
Critical for negotiation; AB & GD show only range
Increases trust; AmbitionBox lacks this
Partially localized; India data thin
Visual differentiator; no India equivalent
Good UX; model quality unclear
Highly SEO-effective; viral in tech community
PR+SEO powerhouse; positions Levels as authority
Unique; no direct competitor for this depth
Government data only; not user-submitted
Lacks review/culture data in compare
Less structured than Glassdoor; free text heavy
Truly unique; critical for comp context
Thin; not a primary use case
Aggregator only; not primary destination
Best-in-class contribution flow; progressive disclosure
Underutilized
Community-maintained; unique asset
High-value B2C monetization; builds trust
Good; could be more AI-powered
Most flexible filter set of all 3 platforms
Weak personalization; no 'For You' layer
Exists; limited public docs
Weak vs Glassdoor Fishbowl; opportunity gap
Best India-context rating taxonomy
Complete context; better than Glassdoor's optional subs
Basic; Glassdoor more polished
Standard; no AI-ranked 'most helpful'
Better granularity for India roles than Glassdoor

India-context native; includes PF/gratuity norms
Unique India nuance; not on Levels/Glassdoor
Buckets, not continuous; Levels has continuous YoE
Standout India-specific tool; no equivalent on others
Simple but useful for appraisal negotiation
Good concept; data quality inconsistent
Strongest comparison feature of all 3 platforms
Good depth; India-specific process types (Group Discussion, Walkin)
SEO goldmine; very India-specific questions
Unique feature for freshers; no equivalent on Levels/GD
Massive PR & SEO driver; India employer brand anchor
Growing; less curated than Glassdoor Bowls
Massive inventory via Naukri; tight integration
Weaker analytics than Glassdoor
Less polished than Glassdoor Enhanced Profile
Naukri login = trust; good India context
Simple; less structured than Levels.fyi
Good fields; verification weak
Functional; UX could be cleaner
Basic; no AI layer; autocomplete functional
Most effective contribution incentive of all 3
Unique; loved by media & investors
Unique predictive-feeling signal
Better trust signal than AmbitionBox
Only platform with visual sentiment breakdown on reviews
Better formatted than AmbitionBox equivalent
Necessary but opaque
Good comms framing; less granular than Levels P10-P90
Less granular than Levels (no stock vs bonus split)
Strong engagement driver; personalization hook
Less transparent data source than Levels

Key differentiator vs LinkedIn/Indeed; salary transparency
Unique; helps candidates pre-qualify employers at search stage
Massive scale; but same inventory as Indeed
Table stakes in 2025
Most structured benefits data of all 3
Good qualitative layer
Best community feature of the 3; role-verified anonymity
Active in US; thin in India
Good; no salary depth in compare view
Highest credibility employer award; media coverage is massive
Strongest employer brand product of the 3
Data-rich; B2B revenue driver
Unique B2B feature; strong employer retention hook
Best-designed review flow; strong validation
Clear; less granular than Levels (no stock/bonus split)
Standard; no AI matching
Early stage; not reliable
Clean dual-mode; role vs company disambiguation
Thought leadership; PR + SEO + B2B credibility

'Write a Review', 'Add Salary' CTAs in sidebar	Overall rating + ABECA badge if winner; review count	None for reading (partial gate for deep access)
'Add Salary' in sidebar	Sample count; 'Based on X salaries' copy	Partial gate after ~3 views (login prompt)
'Add Interview Experience' CTA	Outcome distribution chart (Selected/Rejected %)	None
Stars preview as you rate; char count progress bar	Naukri login = professional credibility signal	Login + Naukri verification encouraged
'Write review for [X]' CTA	Radar chart visual is highly shareable	None
'Nominate your company' for employers	Methodology link; 'Employee Choice' framing	None
Give-to-Get gate is the main CTA; 'Unlock Full Access'	Verified badge; 'Based on X reviews'; Glassdoor quality mark	Give-to-Get gate (soft paywall after ~3 reviews)
'Get Paid More' CTA; compare CTA	'Based on X salaries' + market data note	Give-to-Get for full company-specific data
Rating filter + salary filter are primary conversion drivers	Salary estimate label ('Glassdoor Est.') + company rating badge	None for job search
Progress indicator ('3 of 4 steps'); unlock incentive is the CTA	'Your review is anonymous' trust copy; 'Verified Employee' option	Login required; gate drives it; but low friction once started

'Respond to reviews' is #1 CTA for employers	Review response count shown publicly (trust signal for candidates too)	Employer paid subscription
'Ask anonymous question' FAB	Role verification badge (not name, just 'SWE at Google')	Login + role verification

Key Observations
Zero-login friction for browsing is the #1 growth lever; most users never contribute
Levels is a negotiation prep tool first; this is the core job to be done
Most SEO traffic is internship + FAANG queries
Progressive disclosure keeps completion rate high; verification incentive is strong
Highly visual; strong for social sharing; cities with low data show empty
Unique community feature; power users love it
AmbitionBox is the 'Zomato of employer research' in India; reviews first, salary second
In-Hand calculator is THE killer feature for Indian users; nothing else matches it
Deep SEO moat; millions of queries; interview Q pages are #1 traffic driver
Naukri auth is trust multiplier in India; minimum char enforcement improves quality
Most visually intuitive comparison of the three platforms
ABECA is a powerful brand trust anchor; employers pay for branding around it
The Give-to-Get gate is genius for data quality AND conversion; creates reciprocity psychology
'Compare My Pay' is underrated; strong personalization and retention hook
Salary-first job cards are Glassdoor's biggest UX innovation; transforms job search decision-making
Gate design is masterful; anxiety of 'being caught' is neutralized by anonymity messaging

Employer journey is well-designed; review response is a powerful retention hook for employers

Fishbowl integration gives Glassdoor a living community layer; AmbitionBox can't match this yet

Evidence / Example	Strength / Weakness
Base / RSU / Bonus / Signing shown separately; P25/P50/P75 percentile view; individual rows visible	STRENGTH
L1– L8 abstracted standard allows cross-company comparison; no other platform does this	STRENGTH
Hourly pay + stipends + return offer % by company; student community viral effect	STRENGTH
Geographic choropleth of TC by metro drives media coverage + social sharing	STRENGTH
CTC model, INR, state-wise PT, HRA metro rules — fully India-native data model	STRENGTH
Only tool showing gross-to-net with HRA, PF, PT, TDS, Gratuity — meets a daily user need	STRENGTH
Annual awards with methodology create massive PR, employer subscription revenue, and candidate trust	STRENGTH
Naukri verification + job inventory is a structural advantage from InfoEdge ownership	STRENGTH
Gating data behind contribution creates reciprocity without feeling punitive; unlocks 12 months	STRENGTH
Tracked by media, board rooms, employees — creates virality; uniquely personal accountability	STRENGTH
Showing estimated salary on job listing before clicking is a massive UX innovation that changed industry	STRENGTH
Anonymous but role-verified discussions inside company pages; active community drives repeat visits	STRENGTH
Global recognition; employers pay to be on it; media covers it; candidates trust it	STRENGTH
INR support added but India submissions are low; level mapping mostly US companies	WEAKNESS
No company reviews, no ratings, no WLB data; pure comp play	WEAKNESS
Forum/community barely functional vs Glassdoor Fishbowl or even AmbitionBox feed	WEAKNESS
No 'For You' feed, no saved searches, no alert system, no career path suggestions	WEAKNESS
Self-reported, no verification, many outliers; 'Senior Software Engineer: ₹ 2L– ₹ 50L' ranges are useless	WEAKNESS
'Senior Software Engineer' at TCS vs Google are incomparable; no abstraction layer	WEAKNESS
Too many ads, redirect clicks, unclear navigation; mobile experience lags	WEAKNESS
ESOPs are increasingly common in India startups; no structured ESOP field	WEAKNESS
No India-specific salary tools (no CTC model); review process not India-contextualized	WEAKNESS
'Glassdoor Estimate' is a black box; mixes self-reported + BLS + employer data; no individual rows	WEAKNESS
Reviews can be gamed via employer response priority + suspicious review patterns from paid clients	WEAKNESS
Power users complain about the gate; workarounds (incognito) are common	WEAKNESS

Infosys, TCS, Wipro, Accenture reviews dominate; startup and FAANG India data is thin	OBSERVATION
CTC = Fixed + Variable + Allowances + ESOP; US = Base + Bonus + RSU — need separate data models	OBSERVATION
Most India professionals have Naukri profiles; linking increases review credibility	OBSERVATION
Joining bonus, relocation, PF, gratuity, LTIP, ESOPs, cab facility, meal cards — all unique to India	OBSERVATION
Bangalore SWE = 2– 3x Chennai/Pune for same role; tier-2 cities growing	OBSERVATION
Starts at ~\$2,899/year; includes review response, analytics, branding — high ROI for employers	OBSERVATION
\$499+ per negotiation coaching session; 145+ reviews; leverages user's high salary moment	OBSERVATION
Data licensing to HR tech, ATS vendors, compensation survey firms	OBSERVATION
Companies pay for visibility around 'Best Place to Work' award and certification	OBSERVATION
LinkedIn OAuth or paystub upload; verified % is low but badges signal quality	OBSERVATION
All salary/review data is fully unverified; outliers are rampant; damages trust for high-stakes decisions	WEAKNESS
Reviews can be removed; employees distrust Glassdoor for employer favoritism; 'Glassdoor Expungement' lawsuits	WEAKNESS
Old salary data shown without prominent date warning; market changes make old data misleading	WEAKNESS
Clean layout: pros/cons split, employer response formatted, verified badge placement is clean	STRENGTH
Banner ads, redirect CTAs, affiliate job links break the research flow	WEAKNESS
Dense data table is beloved by engineers; general audience finds it cold	OBSERVATION
None is mobile-first; AmbitionBox app is closest but still lags web	WEAKNESS
Contribution gate creates incentive loop without aggression; user sees value immediately	STRENGTH
LinkedIn verification is optional but the badge creates a visible status signal	STRENGTH
200-char minimum for pros AND cons enforces meaningful reviews vs one-liners	STRENGTH
No points, badges, or leaderboards for top contributors	WEAKNESS
No platform has mapped Indian company grades to a universal level (Analyst→ VP across sectors)	GAP
No platform captures startup ESOP grant size, vesting, strike price, 409A in India context	GAP

Opportunity for Labels	Priority (H/M/L)
Build on this: add Indian rupee CTC breakdown (Fixed+Variable+ESOP); show percentile in India context	H
Create an India-specific level standard: Analyst/Associate/Manager/AVP/VP/Director/VP/CXO normalized across IT, Banking, Consulting sectors	H
India equivalent: Campus placement data (package, company, college, year) — massive SEO + student segment	H
India City Heatmap: CTC by Bangalore/Hyderabad/Pune/Mumbai/Delhi/Chennai; filterable by sector/level	M
Any India competitor must match CTC taxonomy deeply; can differentiate by adding ESOP/RSU valuation and level mapping	H
Build superior version: add New vs Old tax regime, NPS, ESOP tax impact, multiple income sources	H
Create a 'Labels Best Companies' benchmark with transparent data criteria; white-label to employers	M
Build equivalent deep integration with a job platform or become one; or create API for job sites to embed Labels data	M
Adopt + improve: 'Unlock deeper data by contributing one salary/review' with visual progress tracking	H
Add leadership-specific ratings: CEO + Direct Manager + Skip-level approvals; India-relevant 'promoter culture' metric	H
Embed real salary data (not estimates) on job listings for partner job boards; use Labels data	H
Build India's equivalent: anonymous, role-verified communities by company AND by function (e.g., SWE at mid-stage startup)	M
Build India BPTW equivalent with stricter methodology; transparent employee-choice algorithm	M
Labels opportunity: India-first with same depth as Levels.fyi achieves for US; partner with IITs/NITs for campus data seeding	H
Labels can do both: deep comp + culture ratings in one platform; eliminates user needing two products	H
Invest in verified professional community as a retention + contribution loop	M
Build personalization layer: 'Companies matching your level + location + role' feed; offer tracking	M
Labels must implement verified submissions + ML outlier detection + sample-size quality gates	H
India-level normalization: map bands across IT, BFSI, Consulting; huge moat builder	H
Clean, fast, minimal UI is a strong differentiator in India market	M
Add ESOP/RSU grant size + vesting schedule field; critical for startup talent market	H
Labels can win India by being natively India-contextual in every field and calculation	H
Labels should show individual rows (like Levels) for full transparency; trust = granularity	H
Build transparent moderation policy; publish data on review removal rates; employee-first trust positioning	H
Progressive gate: let users see 5 data points free; prompt for contribution at high-value moment	M

Labels should seed startup + FAANG India data first; this is underserved and high intent	H
Build native India CTC schema with all components; map it to total annual value for comparison	H
Explore Naukri/LinkedIn India / GitHub auth for India verification layer	M
Build comprehensive India comp submission form capturing all these; competitors don't	H
City-tier salary matrix (Tier 1 / Tier 2 / Remote-India) is a differentiator; show tier mobility	H
Build employer dashboard early; employer branding + sentiment analytics is a clear B2B wedge	H
Offer data-backed salary negotiation prep as a product in India; \$50– 100 price point; monetizes high-intent visit	H
Build API from day 1; clean data schema enables this; India HR tech is growing	M
Create tiered employer plans: data insights, ABECA-style awards, review response, branding	M
Build a stronger India verification: Naukri/LinkedIn + offer letter upload; show verified % prominently	H
ML-based outlier detection + minimum sample size thresholds + optional verification = data quality moat	H
Publish clear, transparent moderation rules; show audit trail of removed reviews with reason codes	H
Show data freshness clearly: red/yellow/green date labels; weight recent data higher in aggregations	H
Match this standard; add India-specific fields cleanly	M
Clean, ad-free or low-ad UX is a premium differentiator in India	M
Build dual UX: cards for casual users + table/export for power users	M
India is mobile-first; build mobile-native UX from the ground up; WhatsApp salary alerts	H
Adapt: unlock 3 extra company data points per contribution; show counter 'You've unlocked 5 companies'	H
Add visible credibility tiers: Verified ✓ → Offers shown; Unverified shown with disclaimer	M
Adopt + improve: add AI-powered 'Make your review more helpful' prompts to increase quality	M
Build a contributor reputation system: points, levels, 'Top Contributor' badge — drives retention	M
Create 'Labels Level Standard' for India: maps Infosys Band 1– 7, TCS C1– C4, Startup L1– L6 to unified scale	H
Add ESOP module: grant size, vesting schedule, last 409A, dilution round — critical for startup hiring	H
Build offer letter parser (OCR + LLM): paste/upload offer → auto-populate comp form → verified submission	H
Partner with placement cells; build IIT/NIM/BITS placement data; student SEO is massive in India	H
'My offer is ₹ 18L, market P75 is ₹ 24L → here's your negotiation script' — AI-powered, data-backed	H

Show both Gross CTC and Net Take-Home for every salary data point; filter by tax regime	H
Build WhatsApp bot for salary lookup: 'SDE2 at Flipkart, 5yr exp, ₹ 32L — how does this compare?' → instant answer	H
Scrape + structure disclosed compensation from NSE/BSE filings for listed companies; add as 'Official' data source	M
Build India city cost-of-living index; show cost-adjusted equivalent salary; helps tier-2 employees negotiate	M
